The operating room is an intense fast-paced space in a hospital. It is an area where highly trained and skilled medical personnel work to save lives and improve our health through complex procedures. Our program will present an inside look at how the operating room functions. Come along and hear what it's like from the perspective of a surgeon, an anesthesiologist, a nurse and a patient.

Watch this short 10 minute video as a primer to this upcoming event. [OR Video](#)
